

Downloading the Data Quality Review Excel Tool

Having trouble downloading the Data Quality Review (DQR) Excel tool?

Some settings may block the downloaded file from being opened. To fix the problem:

1. Save the download to your computer instead of opening it. If needed, find the file in the Downloads folder and proceed to the next step.
2. Right-click the saved file and choose “Properties” from the menu.
3. A new window will appear. Check the “Unblock” option at the bottom and click “OK” (see graphic below). If “Unblock” is not clickable, try opening the file and then come back to this step.
4. You should now be able to open the file without any problems.
