4.2.4 Proportion of women aged 15-49 who ever experienced sexual violence from an intimate partner

4.2.5 Proportion of women aged 15-49 who experienced sexual violence from an intimate partner in the past 12 months

4.3 – Violence from someone other than an intimate partner

4.3.1 Proportion of women aged 15-49 who ever experienced physical violence from someone other than an intimate partner

4.3.2 Proportion of women aged 15-49 who experienced physical violence from someone other than an intimate partner in the past 12 months

4.3.3 Proportion of women aged 15-49 who ever experienced sexual violence from someone other than an intimate partner

4.3.4 Proportion of women aged 15-49 who experienced sexual violence from someone other than an intimate partner in the past 12 months

4.3.5 Proportion of women aged 15-49 who report sexual violence below age 15

4.4 – Female genital cutting/mutilation (FGC/M)

4.4.1 Proportion of women aged 15-19 who have undergone female genital cutting/mutilation

4.4.2 Among cut women aged 15-19, the nature of procedure performed

4.4.3 Among cut women aged 15-19, proportion who had it performed by a medical practitioner

4.4.4 Proportion of mothers aged 15-49 who have at least one daughter who is cut

4.4.5 Among mothers aged 15-49 with at least one cut daughter, proportion of the most recently cut daughters who had it performed by a medical practitioner

4.5 – Child marriage

4.5.1 Proportion of women aged 18-24 who were married before age 18

5.1 – Health

5.1.1 Proportion of health units that have documented & adopted a protocol for the clinical management of VAW/G survivors

5.1.2 Proportion of health units that have done a readiness assessment for the delivery of VAW/G services

5.1.3 Proportion of health units that have clinical commodities for the clinical management of VAW/G

5.1.4 Proportion of health units with at least one service provider trained to care for and refer VAW/G survivors

- 5.1.5 Number of service providers trained to identify, refer, and care for VAW/G survivors 95
- 5.1.6 Number of health providers trained in FGC/M management and counseling
- 5.1.7 Proportion of women who were asked about physical and sexual violence during a visit to a health unit
- 5.1.8 Proportion of women who reported physical and/or sexual violence
- 5.1.9 Proportion of VAW/G survivors who received appropriate care
- 5.1.10 Proportion of rape survivors who received comprehensive care

5.2 – Education

- 5.2.1 Percent of schools that have procedures to take action on reported cases of sexual abuse
- 5.2.2 Number of teacher training programs that include sexual and physical VAW/G in their curriculums
- 5.2.3 Percent of schools that train their staff on sexual and physical VAW/G issues
- 5.2.4 Proportion of nursing and medical schools that include VAW/G as part of their core curriculum

5.3 – Justice and Security

- 5.3.1 Proportion of law enforcement units following a nationally established protocol for VAW/G complaints
- 5.3.2 Number of law enforcement professionals trained to respond to incidents of VAW/G according to an established protocol
- 5.3.3 Number of VAW/G complaints reported to the police
- 5.3.4 Proportion of VAW/G cases that were investigated by the police
- 5.3.5 Proportion of VAW/G cases that were prosecuted by law
- 5.3.6 Proportion of prosecuted VAW/G cases that resulted in a conviction
- 5.3.7 Number of legal aid service organizations for VAW/G survivors
- 5.3.8 Proportion of women who know of a local organization that provides legal aid to VAW/G survivors

5.4 – Social Welfare

- 5.4.1 Availability of social services within an accessible distance
- 5.4.2 Proportion of women who demonstrate knowledge of available social welfare-based VAW/G services
- 5.4.3 Number of women and children using VAW/G social welfare services
- 5.4.4 Number of VAW/G hotlines available within a specified geographic area
- 5.4.5 Number of calls per VAW/G hotline within a specified geographic area

6.1 – Humanitarian Emergencies Violence Against Women and Girls

- 6.1.1 Protocols that are aligned with international standards have been established for the clinical management of sexual violence survivors within the emergency area at all levels of the health system
- 6.1.2 A coordinated rapid situational analysis, which includes a security assessment, has been conducted and documented in the emergency area
- 6.1.3 The proportion of sexual violence cases in the emergency area for which legal action has been taken
- 6.1.4 Proportion of reported sexual exploitation and abuse incidents in the emergency area that resulted in prosecution and/or termination of humanitarian staff
- 6.1.5 Coordination mechanisms established and partners orientated in the emergency area
- 6.1.6 Number of women/girls reporting incidents of sexual violence per 10,000 population in the emergency area
- 6.1.7 Percent of rape survivors in the emergency area who report to health facilities/workers within 72 hours and receive appropriate medical care

- 6.1.8 Proportion of sexual violence survivors in the emergency area who report 72 hours or more after the incident and receive a basic set of psychosocial and medical services
- 6.1.9 Number of activities in the emergency area initiated by the community targeted at the prevention of and response to sexual violence of women and girls
- 6.1.10 Proportion of women and girls in the emergency area who demonstrate knowledge of available services, why and when they would be accessed

6.2 – Trafficking in Persons

- 6.2.1 Number of specialized services provided to trafficked women and children in a targeted area of destination countries
- 6.2.2 Number of women and girls assisted by organizations providing specialized services to trafficked individuals, in a destination region or country
- 6.2.3 Proportion of people in origin and destination communities who have been exposed to public awareness messages about TIP

6.3 – Femicide

- 6.3.1 Female Homicide
- 6.3.2 Proportion of female deaths that occurred due to gender-based causes

7.1 – Youth

- 7.1.1 Proportion of youth-serving organizations that train staff and front line people on issues of sexual and physical VAW/G
- 7.1.2 Proportion of youth-serving organizations that include trainings for beneficiaries on sexual and physical VAW/G
- 7.1.3 Proportion of individuals who report they heard or saw a mass media message on issues related to sexual violence and youth
- 7.1.4 Proportion of girls who say they would be willing to report any experience of unwanted sexual activity
- 7.1.5 Proportion of girls that feel able to say no to sexual activity
- 7.1.6 Proportion of girls reporting that male teachers do not have the right to demand sex from school children
- 7.1.7 Proportion of girls who believe that girls are not to blame for sexual harassment by a male teacher or student

7.2 – Community Mobilization and Individual Behavior Change

- 7.2.1 Proportion of individuals who know any of the legal rights of women
- 7.2.2 Proportion of individuals who know any of the legal sanctions for VAW/G
- 7.2.3 Proportion of people who have been exposed to VAW/G prevention messages
- 7.2.4 Proportion of people who say that wife beating is an acceptable way for husbands to discipline their wives
- 7.2.5 Proportion of people who would assist a woman being beaten by her husband or partner
- 7.2.6 Proportion of people who say that men cannot be held responsible for controlling their sexual behavior
- 7.2.7 Proportion of people who agree that a woman has a right to refuse sex
- 7.2.8 Proportion of people who agree that rape can take place between a man and woman who are married
- 7.2.9 Proportion of target audience who has been exposed to communication messages recommending the discontinuation of FGC/M

- 7.2.10 Proportion of people who believe that FGC/M should be stopped
- 7.2.11 Proportion of women who do not intend to have any of their daughters undergo FGC/M
- 7.2.12 Proportion of people who believe child marriage should be stopped
- 7.2.13 Proportion of women who do not intend to marry their daughters before the age of 18

7.3 – Working with Men and Boys

- 7.3.1 Number of programs implemented for men and boys that include examining gender and culture norms related to VAW/G
- 7.3.2 Proportion of men and boys who agree that women should have the same rights as men
- 7.3.3 Proportion of men and boys with gender-related norms that put women and girls at risk for physical and sexual violence
- 7.3.4 Proportion of men and boys who believe that men can prevent physical and sexual violence against women and girls
