<p>READ: Hello. I am working on a study approved by the Port City Health Department. We want to talk to people like you who know about this community and ask you a few questions. The purpose of the study is to identify where better health programs are needed in this area in order to prevent the further spread of diseases that are transmitted by sex. I would like to ask you some questions about activities that occur at this place, the people who come here, and programs that may take place here. The interview should take between 20 and 30 minutes of your time.</p> <p>I won't ask your name or any other identifying information. Some people feel anxious or embarrassed when asked these questions. Your participation is completely voluntary and you may decline to answer any specific question or completely refuse to participate. We would greatly appreciate your help in responding to these questions, even though we are not able to financially compensate you for your time. You may not personally benefit directly from this study, but the results may be used to plan a new health program for this area. This is what we will do with the information you give us. Your answers will be recorded on a paper that only identifies this place with a number. Your name will not be recorded anywhere and we won't ask any personal information about you except to make sure you are 15 or older. We are asking people these questions at hundreds of places in this area. The questionnaires will be kept at the Port City Health Department in a locked cabinet. The only people who will see the questionnaires are people working on this study. An ethical review board has reviewed this study. If you have any questions you can ask the Field Coordinator Nelly Harrison. She can be reached at 054 714 260. At the end, we will ask you whether you are interested in having some health education programs here. We want to talk with people age 15 and older.</p>
